As a reminder-peak demand is 8 am to 8 pm meaning we deploy solar in a matter of weeks with planning and finance in place.

Remember no electricity-no economy.

Yemen, Eritrea, Libya, Syria, Egypt, Saudi Arabia, Somalia, Iran, Turkey and Donald Trump makes it a more urgent policy via ESB or Bord Na Mona or the parks and ring fence the revenue for high speed rail etc.

Re: Bordeaux and Ireland PV light for solar projects.

1,700 acres in the Phoenix park, remember 250 acres can power 300,000 homes and funded by the EIB or Asian Bank.

Have a look at this-sheep grazing and solar panels! The state have to own the renewables energy it's a transfer of wealth to the people. Thanks Michael.
