

I was quite alarmed to see this recent article discussing the scourge of one off housing. If I was to make submission to this forum, it would be simply to request 1. an end to the suburbanisation of our rural landscape,
 2. an end to long distance commuting (unless with public transport)
 3. The consultation of planners from UK or Europe where there is clearly more joined up thinking on these issues.

Is mise le meas,
 Michael Molloy, [REDACTED]
