Submission no 5.

Housing / Health related activities for Retirees / Elderly

Consider zoning / incentives for a number of 'Villages' Nationwide where the average Retiree can avail of extended stays at discounted rates while being immersed in a Social Environment focused on Exercise and Health Awareness related activities tailored to their requirements.
This in time might contribute to the general Health awareness of the populace whilst easing pressure on Health Services

Name : Mr Darragh Murphy

Organization : Representing myself as a citizen at the time of these submissions. In the future I may be either -

an owner of / partner within / consultant to / employee of ; a newly formed or existing Architectural Practice / Services company
